The Oklahoma State Regents for Higher Education in compliance with Titles VI and VII of the Civil Rights Act of 1964, Executive Order 11236 as amended, Title IX of the Education Amendments of 1972 , Americans with Disabilities Act of 1990 and other federal laws do not discriminate on the basis of race, color, national origin, sex, age, religion, handicap, or status as a veteran in any of its policies, practices, or procedures. This includes but is not limited to admissions, employment, financial aid, and educational services.

This publication, duplicated by the State Regents' central services, is issued by the Oklahoma State Regents for Higher Education as authorized by 70 O.S. Supp. 1999, Section 3206 . Copies have been prepared and distributed internally. Copies have been deposited with the Publications Clearinghouse of the Oklahoma Department of Libraries.

# Oklahoma State Regents for Higher Education <br> Student Data Report <br> 1999-00 

## Introduction

The Student Data Report for 1999-00 is the $18^{\text {th }}$ annual comprehensive publication of student data derived from the Oklahoma State Regents' Unitized Data System (UDS), which has been in place since 1977. Over time, the Student Data Report has developed into a useful policy and planning tool. Each semester, approximately 75 data elements are gathered for each student (a person who enrolled, had a class/grade action, and paid fees) in Oklahoma higher education. From these data, the UDS constructs state and federal reports and studies.

The annual Student Data Report uses the UDS to produce many of the primary measures of student involvement in higher education such as movement into college, enrollments, student transfer, persistence, and semester credit hours. The enclosed tables and figures are intended for use by public officials, institutional administrators, faculty, staff, and regents in the development of higher education plans and programs.

In 1999-00, there were 30 data reporting entities, institutions, and branch campuses in The Oklahoma State System for Higher Education. The University of Oklahoma Health Sciences Center, Southwestern Oklahoma State University at Sayre, and Oklahoma State University's College of Osteopathic Medicine in Tulsa, Technical Branch in Okmulgee, and Technical Branch in Oklahoma City reported as individual institutions. The enrollments for all other professional schools were reported with the parent institution. Students located at the McCurtain County Higher Education Program, Ardmore Higher Education Program, OSU-Tulsa, as well as other learning sites were reported with their institution of record or the institution that taught the courses. In 1999-00, some of the private institutions did not participate in the UDS, thus grand totals including private institutions are not complete.

The enclosed tables and figures are summaries of more comprehensive and detailed data reports. For example, most of this information can be provided by race and gender. Thus, the Student Data Report also serves as an index to sources of additional data for further study that are available upon request. Since the UDS is continuously edited, reports generated at different times or using different computer programs may produce slightly different populations. If comparisons between tables are made, it is recommended that the user check the grand totals as well as table headings and footnotes before making specific comparisons.

## DEFINITIONS

Athletically-Related Student Aid: any scholarship, grant, or other form of financial assistance, offered by an institution, the terms of which require the recipient to participate in a program of intercollegiate athletics at the institution in order to be eligible to receive such assistance. If a student receives athletically-related student aid for more than one sport, that student is counted only once using the following hierarchy: football, basketball, baseball, cross-country/track, all other sports.

CIP (Classification of Instructional Programs): a classification of program terms and descriptions reflecting the manner in which institutional instructional program data are organized, collected, and reported. Developed by the U.S. Department of Education's National Center for Education Statistics (NCES). Used to report by field of study.

FTE (Full-Time-Equivalent) Enrollment: The numerator used to compute full-time-equivalent (FTE) enrollment is the total semester hours (either full-year or semester) in which all applicable students are enrolled. The denominator is the number of semester credit hours a full-time student needs to earn in one year. The annual FTE denominator for undergraduate enrollment is 30 , based on the estimate that it takes a full-time student 30 hours per year to complete a 120-hour baccalaureate degree program in 4 years. Graduate students are expected to take 12 credit hours per semester or 24 credit hours per year.

Fall Cohort: includes students who enrolled full-time, were degree/certificate-seeking, and were classified as first-time freshmen at an institution during the fall term. Academic activity of the cohort group is tracked for years to determine persistence rates and graduation rates.

First-Time Freshman: an entering freshman who has never attended any college. Includes students enrolled in the fall term who attended college for the first time in the prior summer term. Also includes students who entered with advanced standing (college credits earned before graduation from high school).

Full-Time Student: at the undergraduate level, a student enrolled for 12 or more semester credits, or 12 or more quarter credits, or 24 or more contact hours a week each term.

Graduation Rate: the percentage of students from the original fall cohort who completed a degree program within 150 percent of the normal time. If the degree program normally takes four years to complete, a student would be counted as a completer if he/she received a degree within six years.

Non-Credit Course: a course or activity having no credit applicable toward a degree, diploma, certificate, or other formal award.

Number of Enrollments: This is the cumulative headcount of students enrolled during each semester of the year. It is a duplicated headcount; that is, a student enrolled for the summer, fall, and spring semesters would be counted three times.

Persistence Rate: the percentage of students from the original cohort group who are enrolled during the following year.
Unclassified Student: a student who is enrolled for credit, but not pursuing a degree or formal award.
Unduplicated Headcount: In the unduplicated headcount, a student is counted only once for the full-year time period or for the fall semester. Headcount is unduplicated only within the institution. Consequently, a student who takes courses at two separate institutions would be counted at both institutions. During the time period under consideration, students are assigned to the class level in which they enrolled during their last active semester (freshman/sophomore-lower division, junior/senior-upper division, graduate, and professional).

Student Data Report
1999-00

## Section I: Oklahoma Higher Education

## Higher Education in Oklahoma

- There are 25 public higher education institutions, 15 branch campuses, and 8 learning centers in Oklahoma.
- Oklahoma has 12 private higher education institutions that are regionally accredited.

## Public Enrollments and State Population

The following tables and graphs are based on the most recent national data available, fall 1998.

- In fall 1998, Oklahoma had 4.67 percent of the state population enrolled in public higher education. This compares to 4.65 percent in fall 1997, and 4.68 percent in fall 1996.
- Compared to other states, Oklahoma ranked $13^{\text {th }}$ in the nation. This rank has remained steady for the past three years.

## Private Enrollments and State Population

The following tables and graphs are based on the most recent national data available, fall 1998.

- In fall 1998, Oklahoma had 0.68 percent of the state population enrolled in private higher education. This compares to 0.68 percent in fall 1997 and 0.69 percent in fall 1996.
- Compared to other states, Oklahoma ranked $40^{\text {th }}$ in the nation. For the previous three years, Oklahoma had remained steady at $37^{\text {th }}$.

## Enrollments and Population by Race

The following is based on the most recent national data available, fall 1997.

- In Oklahoma, Asians had the highest percentage enrolled in higher education (14.8 percent). The Native American and Black populations had the second highest percentages ( 5.8 percent each), while Hispanics ( 5.4 percent), and Whites ( 5.2 percent) all had similar percentages. The percentages are comparable to the nation, except higher for Asians and lower for Blacks.

## Section II: Student Preparation

## Oklahoma High School Graduates 1987-88 through 2011-12

This graph shows a projection of Oklahoma public and private high school graduates from 1987-88 to 2011-12. From 1987-88 through 1999-00, the actual number of graduates are shown. The projected period is 2000-01 through 2011-12. On the whole, this projection method yields a gradual decline interspersed with peaks of 37,981 in 2002-03, 37,216 in 2008-09, and 35,768 in 2011-12.

This cohort-survival method projects enrollments and graduates based on the retention or survival of class cohorts from one grade level to the next. Historical data were collected for elementary enrollments, secondary enrollments, and high school graduates for the period 1987-88 through 1999-00. The survival of each cohort, from first grade through graduation, is measured by progression ratios: the change between the number of students enrolled in a grade for a single year and those students who continue to the next grade the following year, (e.g., 2nd Graders 2000 / 1st Graders 1999 = Progression Ratio 2000 [P.R.2000]). Historical Progression Ratios were averaged and a continuous average was applied to each subsequent projected year and class, (e.g., P.R. $1990+$ P.R. 1991....+ P.R. 2000 / $11=$ P.R. 2001). Projected student enrollment numbers for successive grades are then calculated by multiplying enrollments per grade by the Progression Ratio, (e.g., 1st Graders 2000 [actual] x P.R. 2001 = 2nd Graders 2001 [projected] ).

## Oklahoma High School Graduates by County

- From 1996-97 to 1998-99, Cleveland, Oklahoma and Tulsa counties had the largest average number of high school graduates.
- The counties with the lowest average number of high school graduates were Harmon, Cimarron, and Harper.

## Oklahoma First Time Freshmen by County

- From 1997-98 to 1999-00, Cleveland, Tulsa and Oklahoma counties had the largest average number of first-time freshmen in Oklahoma public and private colleges. These same counties produced the most high school graduates.
- The counties with the lowest average number of first-time freshmen were Cimarron, Harmon, and Greer. Cimarron and Harmon counties also produced the fewest high school graduates.

## ACT Scores by Race and Curriculum

- From 1996 to 1999, Oklahoma remained 0.4 to 0.5 points behind the national ACT mean scores. In 2000, Oklahoma narrowed the gap to 0.2 points behind the national ACT score.
- In Oklahoma, those students taking the core curriculum have consistently scored higher on the ACT than those who did not take the core curriculum. This relationship holds true across the different races.

Oklahoma State Regents for Higher Education
Student Data Report
1999-00

## Section III: Enrollments

## Ten-Year Comparison of Annual Unduplicated Headcount Enrollment

The following tables show the total number of unduplicated students enrolled in 37 of the 41 Oklahoma higher education institutions in 1999-00. Four private institutions did not report.

This table and graph compare annual unduplicated headcount for both public and private institutions for ten years. An annual unduplicated headcount counts each student only once for the academic year (summer, fall, and spring).

- Public sector unduplicated headcount enrollment increased from 216,290 in 1989-90 to 230,917 in 1992-93, then generally decreased to 209,559 in 1999-00.
- Public sector enrollment decreased 3.1 percent overall during the 1989-90 to 1999-00 ten-year time period.
- In 1991-92 and 1992-93, enrollment was the largest since first reported in the 1983-84 Student Data Report.

## Ten-Year Comparison of Fall Unduplicated Headcount Enrollment at Public Institutions

The table and graph show 11 years of fall unduplicated headcount enrollment for the public institutions by comprehensive universities, regional universities, and two-year colleges. Students enrolled in more than one institution are attributed to only one institution.

- Between fall 1989 and fall 1999, enrollments in the public institutions increased by 2.5 percent.
- The majority of this increase was at the comprehensive universities, which increased 9.3 percent. The regional universities decreased 1.8 percent. The two-year colleges increased 0.9 percent.

SOURCE: OCR 2300-2.3 Fall 1999, 10/12/00. * Institution began offering 4-year degrees fall 2000.
NOTE: Includes first-time freshmen from summer who continued in fall, includes nonresident aliens, and excludes concurrent high school enrollment.

## Annual Unduplicated Headcount Enrollment by Gender and Class Level

The table and graph show the total number of unduplicated students enrolled in 35 of the 41 Oklahoma higher education institutions in 1999-00, distributed by class level and by gender. Four private institutions did not report.

- At the public institutions, the freshman class consisted of 72,534 students or 34.6 percent of the public annual unduplicated headcount in 1999-00, the sophomore class consisted of 45,298 students or 21.6 percent, the junior class consisted of 17,381 or 8.3 percent, and the senior class consisted of 29,917 students or 14.3 percent.
- At the public institutions, the graduate and professional class levels consisted of 21,443 students or 10.2 percent and 2,786 students or 1.3 percent, respectively.
- At the public institutions, females outnumbered males in 1999-00 by a ratio of 55 to 45 . In 1962, males outnumbered females in Oklahoma higher education by a ratio of 65 to 35 . In the fall of 1972, males outnumbered females by a ratio of 60 to 40 .

## Annual Headcount and FTE Enrollment by Division

The table and graph show headcount and full-time equivalent (FTE) enrollment for 1999-00 by division of study (lower, upper, graduate, and professional). The annual full-time equivalent undergraduate enrollment is calculated by dividing the total number of credit hours enrolled in by undergraduate students by 30 and dividing the total number of credit hours enrolled in by graduate and professional students by 24 . The reason for using 30 and 24 is that a full-time undergraduate student must take 15 credit hours per semester or 30 credit hours per year to complete a bachelor's degree in four years. Graduate and professional students must take 12 credit hours per semester or 24 per year to complete most degrees on schedule.

- In 1999-00, public and private institutions had 227,083 students and 132,276 FTEs.
- Total public institutional headcount consisted of 131,619 (63 percent) lower division students, 50,923 (24 percent) upper division students, 24,230 ( 12 percent) graduate students, and 2,787 (1 percent) professional students.
- Total public institutional FTE consisted of 68,167 ( 57 percent) lower division FTEs, 35,499 (30 percent) upper division FTEs, 11,292 ( 9 percent) graduate FTEs, and 4,157 (3 percent) professional FTEs.

## A Five-Year Comparison of Annual Full-Time Equivalent (FTE) Enrollments

The table and graph show a five-year history with year-to-year comparisons of the annual FTE of all institutions.

- The public sector institutions have shown a 0.5 percent increase in annual FTE enrollments from 1995-96 to 1999-00 and a decrease of 1.1 percent from 1998-99 to 1999-00.
- The comprehensive universities had a 10.8 percent FTE increase from 1995-96 to 1999-00. Regional universities decreased 6.1 percent and two-year colleges decreased 2.5 percent.

* Full-time equivalent (FTE): An annual FTE is calculated for an undergraduate by dividing the total number of credit hours enrolled by all undergraduate students by 30 .

The graduate and professional FTE is calculated by dividing the total number of credit hours enrolled by all graduate and professional students by 24 . Totals may not equal
sums of columns due to rounding of calculations.

## Annualized FTE at Public Institutions 1999-00 Compared to 1998-99

This table compares the annualized FTE enrollments in the public institutions in 1999-00 with the FTE enrollments in 1998-99 by semester and for the academic year.

- The State System FTE for each semester during 1999-00 decreased from 1998-99 levels. State System FTE declined 1,380 (1.1 percent) for the full-year 1999-00.
- The comprehensive universities decreased FTE enrollments overall between 1998-99 and 1999-00, but showed an increase in spring 2000. The regional universities decreased in each semester. Two-year colleges experienced slight increases for summer and fall 1999 but decreased in spring 2000 and for the full-year.

NOTE: May contain concurrent high school enrollments.

* Full-time equivalent (FTE): An annual FTE is calculated for an undergraduate by dividing the total number of credit hours enrolled by all undergraduate students by 30 .

The graduate and professional FTE is calculated by dividing the total number of credit hours enrolled by all graduate and professional students by 24 . Totals may not equal
sums of columns due to rounding of calculations.

## Annual Student Credit Hours by Division

The following graph and table describe annual student credit hours by the division in which the student is classified. For example, the lower division number reflects the number of credit hours in which freshman and sophomore students enrolled.

- Of the $3,480,739$ total student credit hours produced in 1999-00 at public institutions, $2,044,997$ ( 58.8 percent) were taken by lower division students, $1,064,971$ ( 30.6 percent) were taken by upper division students, 271,004 ( 7.8 percent) were taken by graduate students, and 99,767 (2.9 percent) were taken by professional students.

* Division is the level at which the student is classified; may not be the level at which the credit hour was generated

## Unduplicated Fall Headcount Enrollment by Level, Division, and Credit Hours

The following graphs and tables describe the fall 1999 unduplicated headcount enrollment by undergraduate and graduate level and by credit hours. Undergraduate level is further disaggregated by lower and upper division.

- The largest percentage of undergraduates at the public institutions ( 29.8 percent) enrolled in 13 to 15 credit hours in fall 1999: 47.1 percent of the comprehensive university students, 35.3 percent of the regional university students, and 16.0 percent of the two-year college students. The highest percentage ( 23.6 percent) of two-year college students enrolled in 1 to 3 credit hours.
- At the graduate level, more students at the comprehensive universities enrolled in 4 to 6 credit hours ( 30.4 percent) and more at the regional universities enrolled in 1 to 3 hours ( 32.9 percent).

## Annual Unduplicated Enrollment by Field of Study and Class Level

The following tables describe the number of unduplicated headcount enrollments in higher education institutions in 1999-00 by field of study and by class level.

- At the public institutions, Business Management was the most popular field of study in 1999-00 with 25,477 (12.1 percent) students enrolled. Education was second with 25,023 ( 12.0 percent) students enrolled. In 1998-99, Education was first and Business Management was second. These have been the top two fields since the first Student Data Report was published in 198283.
- At the private institutions, Business Management was the most popular field of study in 1999-00 with 4,027 (24.3 percent) students enrolled. Education was second with 1,617 ( 9.7 percent) students enrolled. It was the same in 1998-99, and these have been the top two fields since the first Student Data Report was published in 1982-83.

## Unduplicated Headcount Enrollments at Public Institutions 1999-00 Compared to 1998-99

This table compares 1999-00 and 1998-99 unduplicated headcount enrollments at the public institutions by semester.

- In 1999-00, all three semesters experienced declines from the previous year, resulting in a State System decrease of 2,317 students (-1.1 percent) for the year. Over the past five years, State System enrollment has declined 3.8\%.
- Three institutions with the largest increases in the State System were Oklahoma State University ( 287 students, $1.2 \%$ ), Oklahoma City Community College (262 students, 1.8\%), and Redlands Community College (240 students, 8.3\%).
- Tulsa Community College had the largest decrease in enrollment, with 854 fewer students than the previous year.
- From 1998-99 to 1999-00, comprehensive universities’ enrollment increased by a total of 195 students ( +0.4 percent); regional universities' enrollment decreased by a total of 846 students ( -1.4 percent); and two-year colleges decreased by a total of 1,666 (1.8 percent).

NOTE: May contain first-time unclassified students and concurrent high school enrollments.

## Concurrent High School Enrollment at Public Institutions

This table contains data from public higher education institutions authorized to concurrently enroll high school students in higher education. These students also are present in the other enrollment tables.

- In 1999-00, 2,781 high school students were reported as concurrently enrolled in at least one college course. These students enrolled for a total of 17,657 credit hours or 589 FTEs.
- In 1996-97, 2,830 high school students were concurrently enrolled for a total of 18,157 credit hours or 605 FTEs.

SOURCE: UDSENR11, 5/18/01. Institution began offering 4-year degrees fall 2000.
NOTE: FTE may not total due to rounding of calculated values. ** Did not report. $\quad * * *$ Full-year is unduplicated between semesters.

* Full-time equivalent (FTE): An annual FTE is calculated for an undergraduate by dividing the total number of credit hours enrolled by all undergraduate students by 30 . The graduate and professional FTE is calculated by dividing the total number of credit hours enrolled by all graduate and professional students by 24 . Totals may not equal sums of columns due to rounding of calculations.

## Non-Credit Activity

The following tables describe the nature and level of public service provided by Oklahoma public colleges and universities that reported offering non-credit activities. The information provided indicates a range of activities and groups served by public institutions. Participant contacts indicate the number of participants recorded as attending and participating in non-credit activities; therefore, an individual citizen may be counted in more than one activity. In some activities, participant contacts may be estimated, as in large lectures or artistic and music presentations. Non-credit courses and activities are provided on a self-supporting basis and are not reported for state funding.

- During 1999-00, 17 institutions reported participant contacts totaling 236,444 in non-credit activities at two comprehensive universities, six regional universities, and nine two-year colleges. This compares to 15 institutions reporting participant contacts totaling 252,250 in non-credit activities for 1998-99.
- Between 1998-99 and 1999-00, non-credit activities declined 19,816 (14.3 percent) at the comprehensive universities. Non-credit activity increased 2,718 ( 8.0 percent) at the regional universities and 1,292 ( 1.6 percent) at the two-year colleges.
- The Group Served table reflects the reporting institution's determination of the group for which an activity was primarily directed. According to the table, the major groups served were the government, educational institutions, business and industry, and community agencies. These were also the major groups served during 1998-99. All groups except educational institutions and health and human services experienced declines in non-credit activity during 1999-00.
- The Major Focus of Activity data by type of institution shows the top three areas are education, upgrading skills, and government. Of these, education and government increased 6.5 percent and 55.6 percent, respectively, while upgrading skills decreased 54.9 percent from 1998-99.
- The Format table shows that courses, seminars, and workshops are the top formats of non-credit activities. During 1999-00, seminars increased 13.8 percent from 1998-99, while courses declined 12.2 percent and workshops declined 34.7 percent.
- The top three counties represented for 1999-00 are Oklahoma, Cleveland, and Tulsa counties. Oklahoma county increased 12.6 percent from 1998-99, while Cleveland county decreased 6.4 percent and Tulsa county decreased 18.3 percent.

## Oklahoma State Regents for Higher Education

 Student Data Report1999-00

## Section IV: Access to Higher Education

## Geographic Origin of Students in Public and Private Institutions

The following three tables describe the geographic origin of students enrolled in Oklahoma higher education.

- Oklahoma, Tulsa, and Cleveland counties were the top three counties of origin for public institutions.
- Oklahoma, Tulsa, and Pottawatomie counties were the top three counties of origin for private institutions.
- For public institutions, Texas, Kansas, Arkansas, California, and Missouri were the top five states of origin for out-of-state students.
- For private institutions, Texas, Kansas, Missouri, Arkansas, and Colorado were the top five states of origin for out-of-state students.
- Malaysia, India, China, and Taiwan were the top countries of origin for public institutions, while Singapore, India, China, and Taiwan were the top countries of origin for private institutions.

* Institution began offering 4-year degrees fall 2000.

## Direct from High School-to-College-Going Rate

The first-time freshmen who entered college directly from high school are estimated by those who were 17 to 19 years old and were Oklahoma high school graduates. Each category on the map represents approximately one-third of the 77 counties in Oklahoma.

- For 1996-97 through 1998-99, the statewide average college-going rate was 56.5 percent.

SOURCE: Oklahoma High School Indicators Project, High School to College-Going Rate, OSRHE, March 2001.
NOTE: First-time freshmen may not sum to total because of incorrect coding; therefore, they do not relate back to any particular
Oklahoma county. Other slight discrepancies may occur because of rounding.

## First-Time Freshman Enrollments at Public Institutions

- The number of new freshmen decreased 0.16 percent from 28,268 in fall 1998 to 28,224 in fall 1999.
- Comprehensive university fall first-time freshmen increased 6.63 percent from 5,717 to 6,096 .
- Regional university fall first-time freshmen increased 1.7 percent from 7,046 to 7,166.
- Two-year college fall first-time freshmen decreased 3.5 percent from 15,505 to 14,962.

## Enrollment in Public Institutions by Race, Gender, Class Level, and Full-Time/Part-Time Status

- In fall 1999, full-time students comprised 59.8 percent of the total headcount enrollment, and part-time students made up the remaining 40.2 percent.
- Most undergraduate students enrolled as full-time students ( 62.4 percent) and most graduate students enrolled as part-time students (65.3 percent).
- Both male and female students enrolled more often as full-time students ( 62.9 percent and 57.2 percent, respectively).
- Women outnumbered men in Black, Native American, Hispanic, and White enrollments. Women comprised 57.6 percent of the Black enrollments, while 42.4 percent were men. Native American enrollments consisted of 57.6 percent women to 42.4 percent men. Women made up 52.8 percent of Hispanic enrollments, and men made up 47.2 percent. In the other two categories, men outnumbered women. Men comprised 63.2 percent of the Nonresident Alien enrollments and 50.9 percent of the Asian enrollments.

## Unduplicated Headcount Student Enrollments at Public Institutions by Race and Gender

- Overall, there were more women than men enrolled in Oklahoma public institutions for fall 1999. Women held 54.9 percent of the total enrollments, while males held 45.1 percent.
- This holds true for all race categories, except Nonresident Alien and Asian.

## Percentage of Students by Race Within Each Public Institution

- Minority enrollments made up 26.6 percent of the State System's enrollment in fall 1999.
- The Native American population had the highest minority enrollment with 9.2 percent.
- Minority enrollment made up 25.9 percent at the comprehensive universities, 30.2 percent at the regional universities, and 24.4 percent at the two-year colleges.

## Percentage of Student Enrollment by Race Within the State System

This table distributes the fall 1999 student enrollments by race for each institution.

- Nonresident Aliens and Asians had the majority of their enrollment in comprehensive universities ( 56.7 percent and 43.3 percent, respectively)
- Blacks were the only race with the largest percentage of their enrollment in the regional tier.
- For Hispanics, Native Americans, and Whites, enrollment at two-year colleges made up the largest percentage of their total enrollments ( 40.4 percent, 39.8 percent, and 39.5 percent, respectively).

## Percent of Population by Race Enrolled in Public and Private Higher Education by State

The most recent national data available are for fall 1997.

- In Oklahoma, the Asian population had a higher percentage enrolled in higher education than nationally. Native Americans had a lower percentage enrolled in higher education than nationally. All other race categories had similar percentages when compared to the U.S.

## Comparison of Fall Headcount Enrollments of Male Students

- There was an increase in enrollment for male students from fall 1989 to fall 1999. The comprehensive universities and two-year colleges experienced increases in male enrollments for this time frame; however, the regional universities had a decrease (from 20,377 to 19,830 ).

[^5]Ten-Year Comparison of Fall Headcount Enrollments of Male and Female Students

## Comparison of Fall Headcount Enrollments of Female Students

- Although female participation decreased from fall 1998 to fall 1999, female participation in higher education has shown an overall increase since 1989. Between fall 1989 and fall 1999, headcount enrollments for females increased from 81,676 to 84,255 . The comprehensive institutions showed the only increase in enrollments where female enrollments have increased from 20,324 in fall 1989 to 23,303 in fall 1999.

## Comparison of Fall Headcount Enrollments for Native American Students

- Native American enrollments at the comprehensive and two-year tier increased every year from fall 1989 to fall 1999. Native American enrollments at the regional tier experienced a slight decline in 1996, but have generally increased over the ten-year period. The net increase for all public institutions was 6,201 students.

## Ten-year History of the Mean Age of Students Enrolled in Oklahoma Public Institutions by Gender, Race, Class Level, and Status

This table is a ten-year history of the mean age of students enrolled in the public system. The table tracks the mean age of students enrolled in higher education by race, gender, class level and attendance status.

- The mean age of students decreased in most race categories with an overall decrease of 0.79 years from 27.56 to 26.77 during the ten-year period.
- The mean age of females and males decreased from 28.54 to 27.43 and 26.47 to 25.97 , respectively. In fall 1999, the average age of females enrolled was 1.46 years higher than that of males.
- When comparing age by race, the only increase occurred for Black students (from 26.48 to 26.54).
- The greatest increase by class level was in the unclassified category where the mean age increased from fall 1989 to fall 1998. Freshman, junior, senior, and graduate levels decreased; sophomore and professional levels increased.

## Percent First-Time Freshmen in Public Institutions by Age

- This graph provides the percent of first-time freshmen in public institutions by age for fall 1999. This information used in conjunction with the cohort-survival projections may be useful for institutions like The University of Oklahoma which had approximately 96 percent of its first-time freshmen between 17 and 19 years of age in fall 1999. Two-year colleges would find these projections less useful since a smaller percentage of their first-time freshmen were between 17 and 19 years of age in fall 1999.

## PERCENT OF FIRST-TIME FRESHMEN IN PUBLIC INSTITUTIONS BY AGE

FALL 1999

## Five-year History of Students Receiving Financial Aid

This table reflects the unduplicated recipients for each financial aid category as a percentage of the total unduplicated headcount enrollment at public institutions for five twelve-month time periods.

- In 1995-96, 47.9 percent of all unduplicated students received at least one form of financial aid. By 1999-00, this percentage rose to 50.9 , which indicates that more than half of the unduplicated students received some form of financial aid. All categories of financial aid increased in unduplicated recipients since 1950.
- In 1999-00, grants were the most common form of financial aid received (36.0 percent), followed by loans and scholarships (25.1 and 12.0 percent, respectively).

PERCENT OF TOTAL UNDUPLICATED STUDENTS IN PUBLIC INSTITUTIONS RECEIVING FINANCIAL AID BY CATEGORY OVER FIVE YEARS

| TYPE OF AID | $1995-96$ | $1996-97$ | $1997-98$ | $1998-99$ | $\mathbf{1 9 9 9 - 0 0}$ |

## Financial Aid Recipients Compared to Enrollment

This table shows unduplicated financial aid recipients as a percentage of unduplicated headcount enrollment for each public institution. It also shows the percentage of total public system financial aid recipients per institution and percentage of total public system enrollment per institution.

- Two-year colleges have the smallest percentage of their student body receiving aid (37.1 percent) while contributing the largest percentage of students enrolled in the State System. Comprehensive universities have the largest percentage of students receiving financial aid ( 63.3 percent) followed by regional universities ( 57.1 percent). Both comprehensive and regional universities have a higher proportion of students receiving aid than the proportion of total students within the State System.

${ }^{1}$ Institution began offering 4-year degrees fall 2000. ** 1998-99 financial aid recipient data.

## Transfer Activity in the Oklahoma State System

As was reported in the Student Data Report for 1998-99, the following information describes a cohort flow methodology rather than the flow of all students from the fall semester of one academic year to the next academic year. Students who are considered first-time transfers include immediate transfers and those who delay transfer for only one year.

- Immediate transfer - a student who was enrolled the previous academic year at another Oklahoma institution of higher education and transferred without a break in enrollment to the current institution.
- Delay transfer - a student who was not enrolled the previous academic year, but transferred hours from another institution.

## Transfer of Students by Race and Gender

- Both males and females had similar transfer patterns: males transferred from two-year to four-year institutions at a rate of 41 percent, while females transferred at a rate of 38 percent. Males transferred at a rate of 21 percent while females transferred at a rate of 23 percent from four-year to two-year.
- The Non-resident Alien, Asian, and Hispanic categories had the highest percentage of student transfers from two-year to four-year institutions ( 75 percent, 50 percent, and 42 percent, respectively). Black and Native American categories had the highest percentage of transfers from four-year to two-year institutions ( 27 percent and 25 percent, respectively).

## TRANSFER PATTERN OF STUDENTS <br> WITHIN OKLAHOMA <br> FROM PUBLIC AND PRIVATE INSTITUTIONS TO PUBLIC INSTITUTIONS BY RACE AND GENDER <br> AS OF SPRING 2000 FOR THE 1997-98 COHORT

## Transfer of Two-Year College Students to Public Comprehensive or Regional Universities

- From fall 1990 to fall 1994, the percentage of students who began as freshmen in two-year colleges and transferred to a public comprehensive or regional institution within six years decreased from 36.4 percent to 30.6 percent.
- The percentage of public two-year to four-year transfer students who earned a bachelor's degree within six years decreased from 20.3 percent to 17.8 percent from the fall 1990 cohort to the fall 1994 cohort.

PERCENT OF PUBLIC TWO-YEAR COLLEGE COHORT TRANSFERRING WITHIN A SIX-YEAR PERIOD TO PUBLIC COMPREHENSIVE OR REGIONAL INSTITUTIONS

| FALL COHORTS |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| 1990 | 1991 | 1992 | 1993 | 1994 |

## Student Transfer Activity

The following graph and table describe the transfer of the 1997-98 freshman cohort as of spring 2000. Additional tables by full-time/part-time status, race, and gender are available upon request.

- For 13 of the public institutions, more students transferred "from other public institutions" than "to other public institutions" which would be considered a net gain for those institutions.

1999-2000

## Section V: Outcomes

## First-Year Persistence Rates First-Time Full-Time Freshmen Within the State

The following graph and table show a nine-year summary of persistence rates for the fall cohorts within the state, that is, new freshmen who enrolled in the same or another Oklahoma higher education institution the following year.

- Persistence rates for new freshmen increased from fall 1990 to fall 1998 at the comprehensive universities from 88.9 to 89.4 percent, increased at the regional universities from 77.6 percent to 78.9 percent, and decreased at the two-year colleges from 68.6 to 67.5 percent. Generally, persistence rates have increased after reaching a low point in fall 1994.

## Graduation Rates First-Time Full-Time Freshmen Within the State

The following graph and table show a summary of graduation rates for the fall cohorts within the state, that is, new freshmen who graduated in the same or another Oklahoma higher education institution. The graduation rates are six-year rates for comprehensive and regional universities, and three-year for two-year colleges.

- Graduation rates for new freshmen from fall 1990 to fall 1994 increased at the comprehensive universities from 49.4 to 54.5 percent and increased at the regional universities from 34.3 to 35.5 percent. Graduation rates for new freshmen from fall 1993 to fall 1997 increased at two-year colleges from 14.6 to 18.7 percent.

## Graduation Rates First-Time Full-Time Freshmen Within the Institution

The following graph and table show a summary of graduation rates for the fall cohorts within the institution, that is, new freshmen who graduated from the Oklahoma higher education institution where they began their education. The graduation rates are six-year rates for comprehensive and regional universities, and three-year rates for two-year colleges.

- Graduation rates for new freshmen from fall 1990 to fall 1994 increased at the comprehensive universities from 44.0 to 49.7 percent and increased at the regional universities from 27.6 to 29.3 percent. Graduation rates for new freshmen from fall 1993 to fall 1997 increased at two-year colleges from 14.3 to 18.0 percent.

## Graduation Rates of Athletic Scholarship Students

The following table shows a summary of graduation rates for the fall athletic cohorts within the institution, that is, new freshmen receiving athletic assistance who graduated from the Oklahoma higher education institution where they began their education. The graduation rates are six-year rates for comprehensive and regional universities, and three-year rates for two-year colleges.

- Graduation rates for freshman athletes in all sports from fall 1992 to fall 1994 increased at the comprehensive universities from 34.4 percent to 39.0 percent, and increased at the regional universities from 34.0 percent to 36.5 percent. Graduation rates for freshman athletes in all sports from fall 1995 to fall 1997 decreased at two-year colleges from 31.2 percent to 30.9 percent.
