OKLAHOMA EDUCATIONAL INDICATORS PROJECT MEAN ACT COMPOSITE SCORE BY HIGH SCHOOL SITE

Background

With the passage of the "Oklahoma 2000 Education Challenge Act" in May of 1989, the state of Oklahoma affirmed a commitment to promoting excellence in the education of Oklahoma children. The act established that the State Board of Education publish annually a summary report of information provided by the Oklahoma Educational Indicators Project. The purpose of this program is to develop and implement a system of measures or indicators of educational performance. The act also mandated that the State Regents cooperate in the annual publication of this report. The State Regents, with the cooperation of the State Department of Education and other agencies, has participated in the development of indicators of comparative educational standing and accomplishment. The High School Indicators Project reports on: (1) ACT scores, (2) college-going rates, (3) college credit hours and GPA, and (4) remediation rates.

This Mean ACT Scores High School Indicators Project report provides the mean ACT scores of Oklahoma high school graduates. The ACT test is a measure of educational development. Performance on the test is influenced by the student's educational experiences, as the patterns of difference in average scores according to type of high school program clearly indicate. The ACT Corporation cautions against using the ACT test scores in isolation from other measures to infer the overall quality of schools and education within a state. Specifically, the ACT tests are designed to measure high school students' educational development as related to their readiness to pursue further study at the college level.

The ACT test-takers included in this report are those students taking the ACT who were in the 2001 graduating class. The ACT results for 2001 offer Oklahoma the opportunity for the tenth year to consider only test-takers who took the ACT exam. The mean ACT scores are reported by county, district, and high school site. For high schools with five or fewer ACT test-takers, an asterisk was entered in the mean ACT column in order to comply with the federal privacy act. A few high schools have a blank entry, which indicates that there was no ACT test-takers reported that year.

Methodology

The State Regents compute the mean ACT composite and subject scores for Oklahoma and each individual high school site based on the *highest* test score of those 2001 graduates who took the ACT more than one time. ACT, Inc. calculates the mean ACT composite score on the *last* test score. Therefore, the computed mean ACT scores by OSRHE and ACT, Inc. are not comparable. For example, 2001 high school graduates earned a mean ACT composite of 20.7 when calculated using the highest score and 20.5 when calculated using the last score. The rationale for using the highest scores for this report is that a student's highest--not last--score is used, among other factors in making collegiate level decisions about the student. Consequently the highest score more accurately reflects Oklahoma student achievement.

The student's ACT score is attributed to the high school where the highest score was earned. If the high school code does not match an Oklahoma high school, then other test dates are searched for a valid high school code. If no match is found for an Oklahoma resident, then the score is excluded from the report.

Summary of Results

The summary table of 2001 high school graduate mean ACT composite scores is by county. When the counties are ranked from highest to lowest, Washington ranks first with 22.8, Payne with 22.0, Harman with 21.8; Tulsa (21.7), and Alfalfa and Cleveland counties (both with 21.6). The map depicts these same mean ACT composite scores categorized according to performance criteria for admission to Oklahoma public colleges and universities for first-time entering students.

The mean ACT composite scores range from 13.6 for Riverside School in Caddo County with 12 test-takers to 30.6 for the Oklahoma School of Science and Math in Oklahoma County with 71 test-takers. The high school with the largest number of high school graduates who took the ACT exam was Broken Arrow High School in Tulsa County with 627 test-takers and a mean ACT composite of 21.6, followed by Union High School in Tulsa County with 622 test-takers and a mean ACT composite of 22.4.

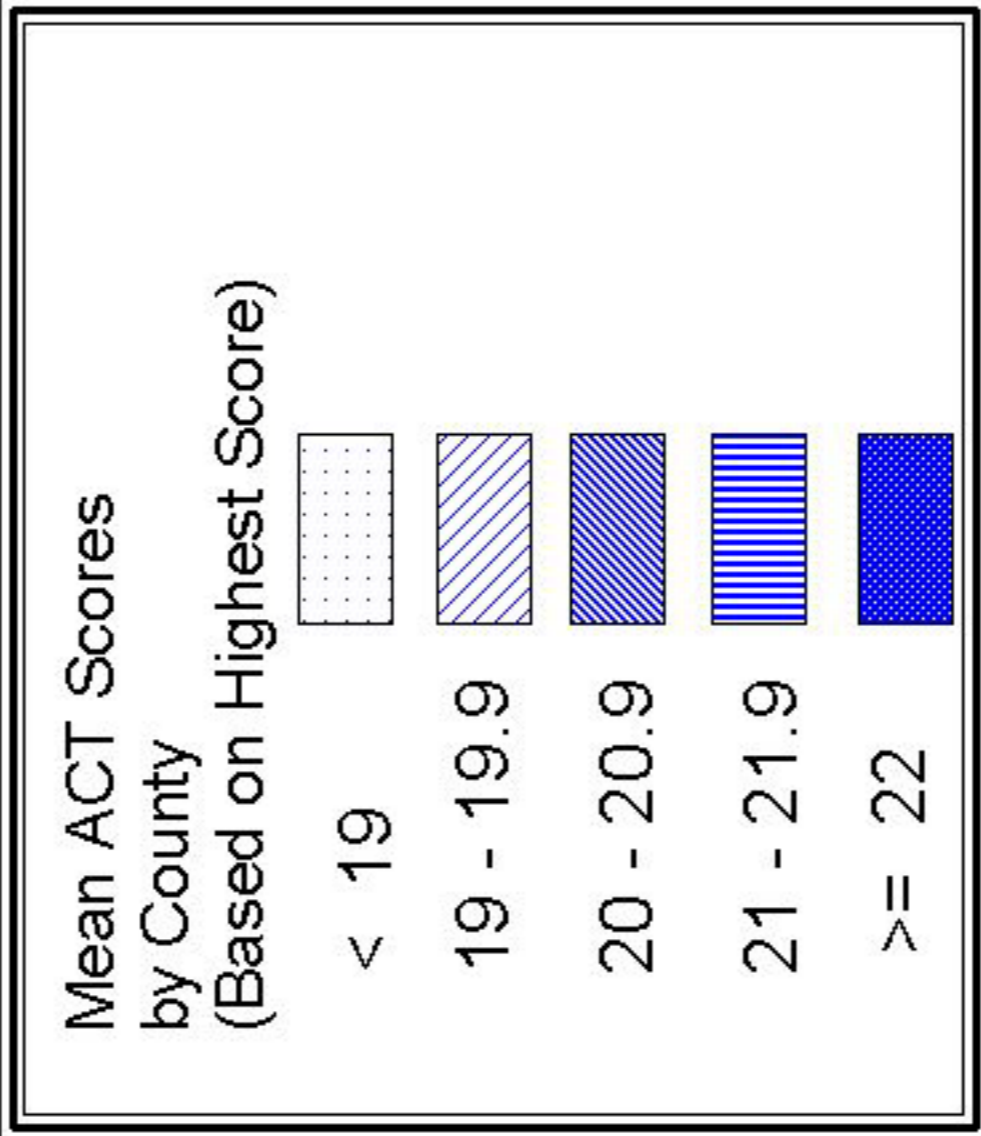

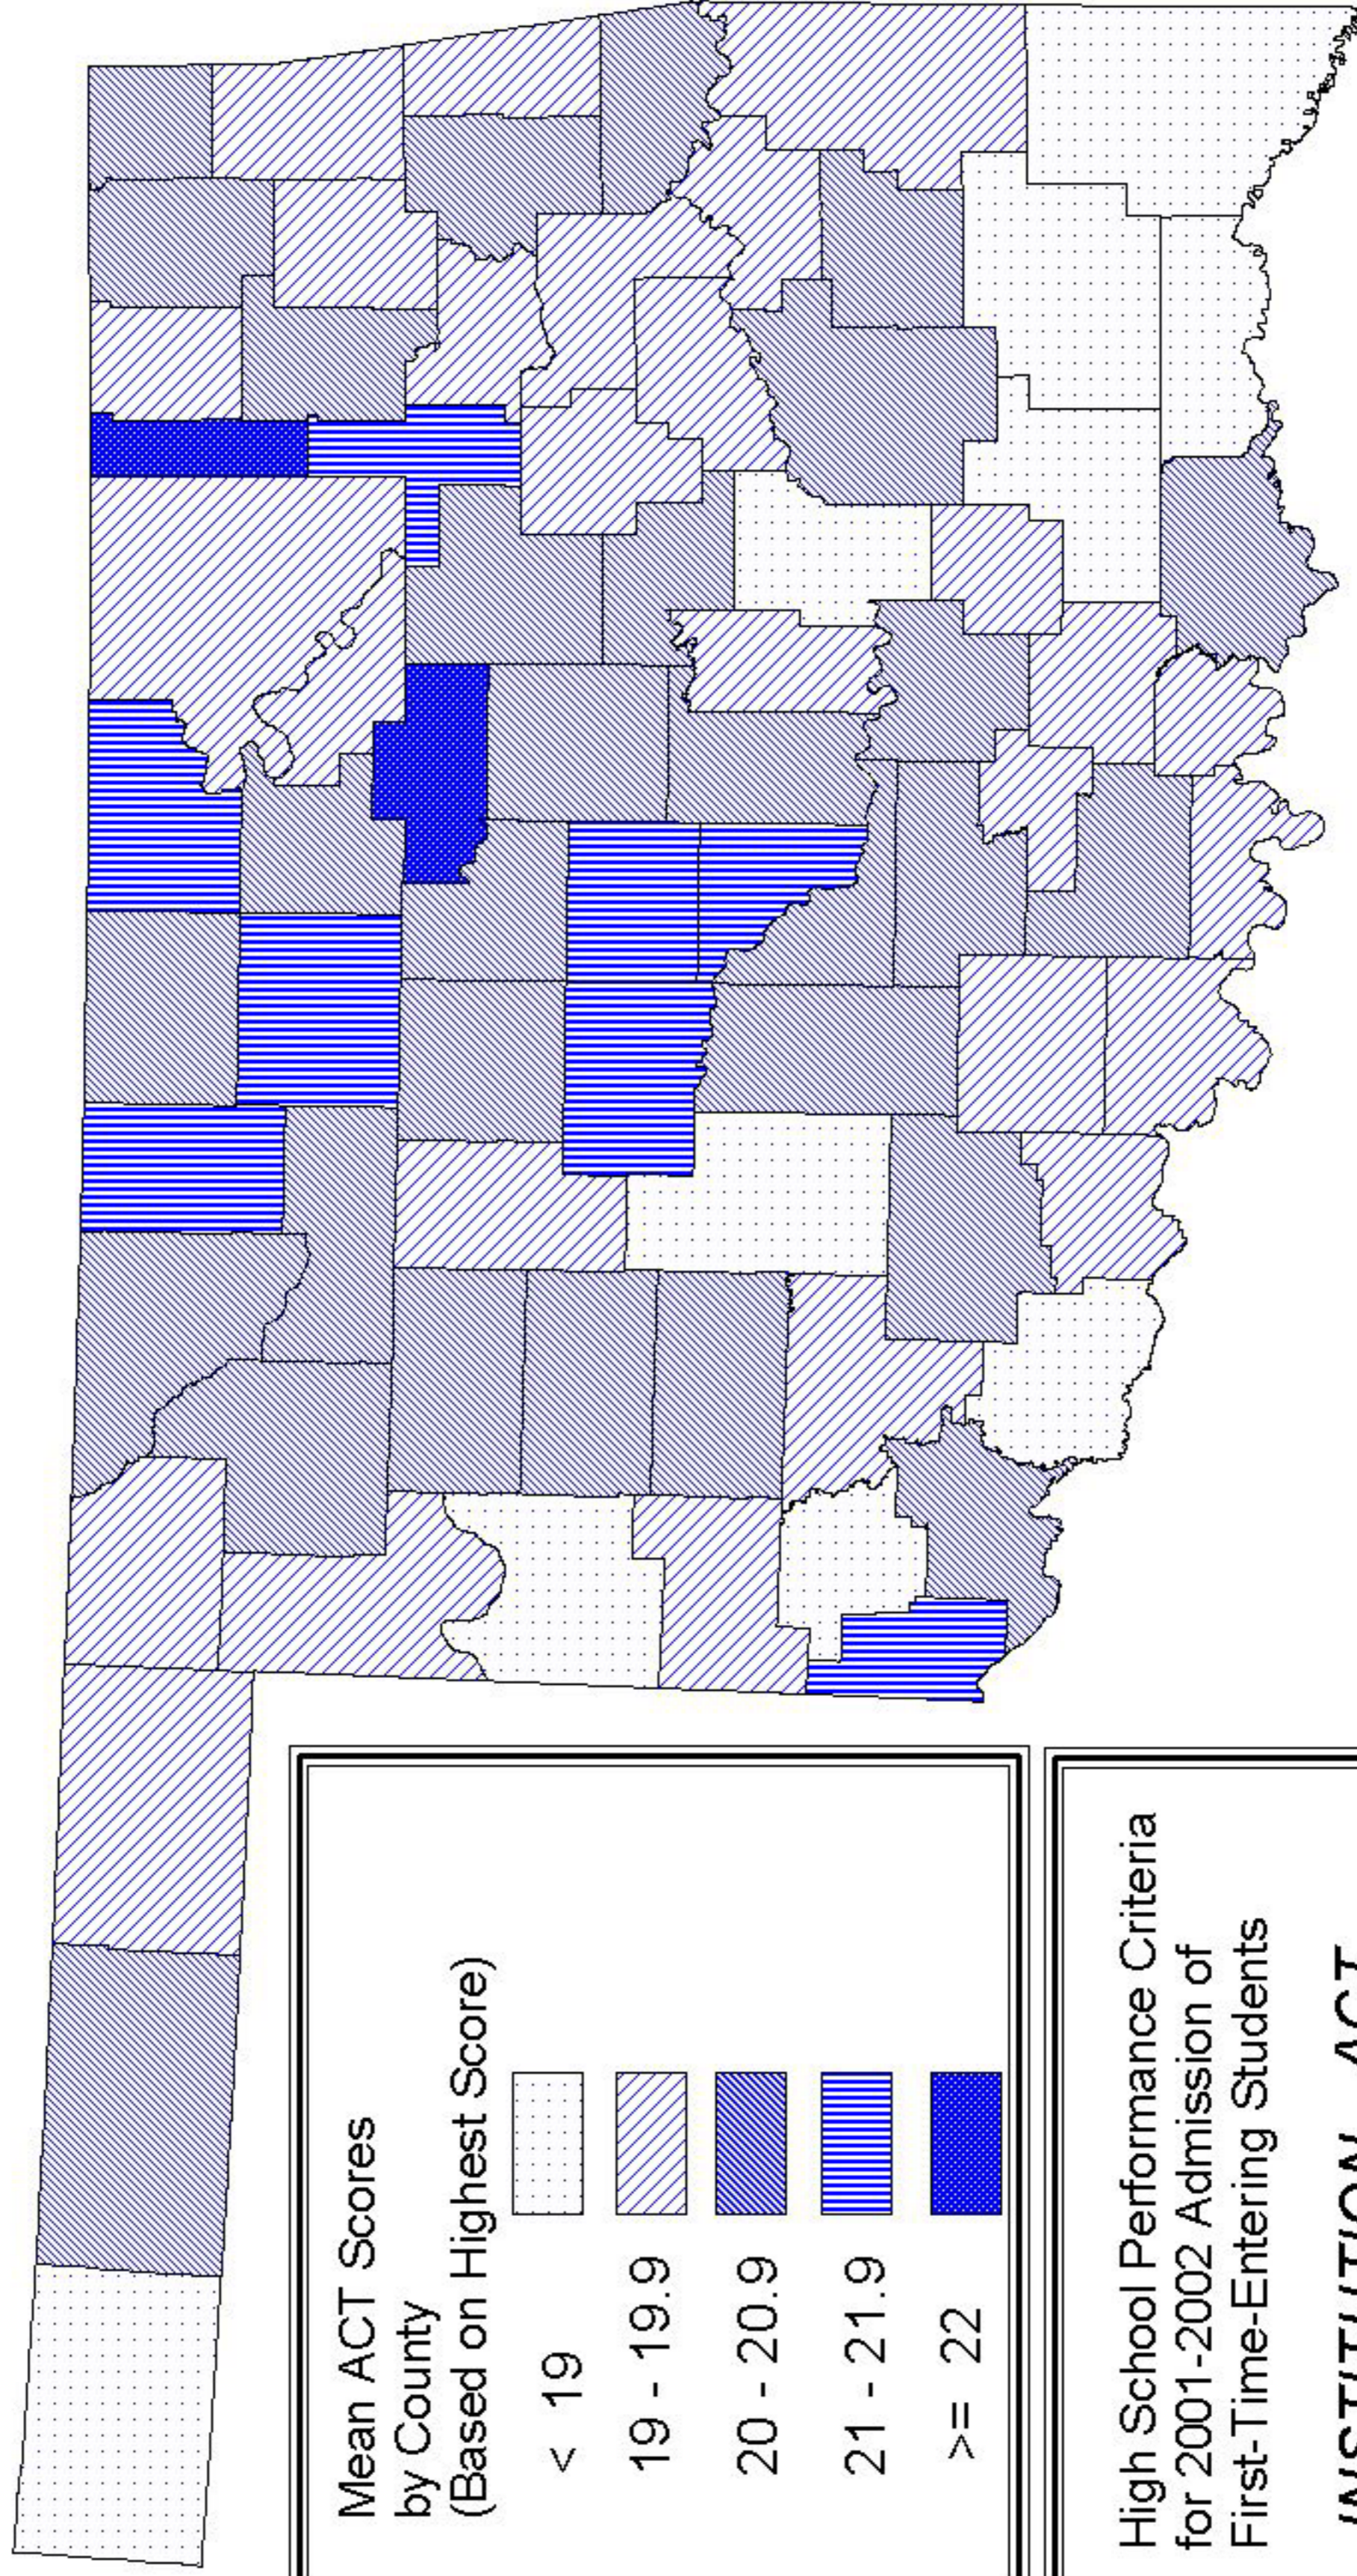

Subject scores are also based on the highest subject score for those 2001 graduates who took the ACT more than one time. Ranked highest to lowest the mean subject scores for the state of Oklahoma are as follows: reading (21.6), science reasoning (21.2), English (20.7), and mathematics (20.0). The scores range from a high of 31.7 in mathematics to a low of 11.0 in English.

The table entitled "Mean ACT Scores, Frequency Distributions, and Cumulative Percentages for All Students" for Oklahoma and the nation is from the ACT High School Profile Report, H S Graduating Class 2001. According to ACT, 1,069,772 high school graduates across the United States took the test. Oklahoma high school graduates represent 27,910 of these test-takers. Most of these Oklahoma test-takers, 25,486 or 91.3 percent provided enough information to be matched with a high school ACT code and Oklahoma State Department of Education county/district/site code.
